We have an issue in Region 6 regarding a dump that is on fire in the Bella Vista area of Arkansas. It has been burning since the summer and at the request of the State of Arkansas, we have conducted some air sampling/monitoring to provide environmental data to the state to assist them in their decision making. We also provided some technical advice on response options to the State of Arkansas by having landfill cap and subterranean fire experts from ORD visit the site last week. I have attached the options paper to this invite. There is the potential for the State of Arkansas to refer the site to EPA for response action. We are setting up this conference call to discuss response authority. Thank you in advance for your assistance.
